PARTNERS TO RELY ON

In recognition of the company's technical design-in experience, AVX has appointed DMTL as hi-reliability, advanced and MIL product distributor.

Passives supplier AVX is expanding its high technology range in response to market demand for higher specification products in aerospace, satellite communications, medical and military markets. This requires support from distributors who can offer a high level of customer support, advice and service. With over 20 years experience, DMTL will fulfil this key requirement in its role as hi-rel/MIL specialist distributor.

A range of products will be available with the hi-rel/MIL tag, including tantalum and ceramic capacitors, EMI filters and inductors. Several grades are available for each range

DMTL HAS BEEN APPOINTED HI-RELIABILITY, ADVANCED AND MIL PRODUCT DISTRIBUTOR FOR AVX

covering specifications from commercial to hi grade military applications.

First for cable selection

With a product list of over 10,000 items, Alpha Wire claims to offer the industry's widest range of wire, cable and tubing products, now available from franchised distributor, **Aerco**.

Cable product manager at Aerco, Andy Gale, said: "Alpha Wire has the products and the expertise that advanced technology companies rely on for critical applications. We now offer a range of cable products from tough, durable Xtra-Guard electronic cables to the manufacturing-critical Alpha Wire Industrial Series through to a comprehensive range of heat shrink products."

WHAT'S THE ALTERNATIVE?

RS Components has extended its own brand product range, widening product availability with what it believes to be credible alternatives to manufacturer brands. All products are selected to provide quality, value-for-money and choice, with over 35,000 products in the range.

A team of engineers at the RS laboratory in Corby ensure all own brand products comply with statutory and legislative requirements by working in conjunction with suppliers and other regulatory authorities such as the HSE.

The own brand range, which is said to offer considerable savings over leading brands, is supported by RS' service reliability, with its 99.7 per cent order fulfilment record. Full product listings can be seen on-line or customers can view products before they buy at their local RS trade counter.
